QUANTITATIVE TECHNIQUES - 1, (DMGIT 204) (DCOM203)

Theory Questions

Ques: 1: What is meant by Statistics? What are its characteristics and stages of Statistical Analysis?

Ques: 2. Discuss the importance, scope and limitations of Statistics.

Ques: 3. What is meant by Classification? Explain its types and requisites of a good classification.

Ques: 4. What is meant by Tabulation? What are the main parts of a Table and Methods of Tabulation?

Ques: 5. Explain types of Table. Show the format of a Table.

Ques: 6. What is Meant by Diagrammatic Presentation? Discuss its merits and demerits.

Ques: 7 What are the General rules for making diagrams?

Ques: 8. What is meant by collection of Data? Discuss the Methods of collecting data along with merits and demerits. ← Primary Data

Ques: 9. What is meant by Secondary Data collection? Discuss its sources.

Ques: 10 Discuss:- (Short)

a) Functions and meaning of an average along with its various measures.

b) Arithmetic Mean → Properties, Merits & Demerits

c) Median → Properties, Merits & Demerits

d) Mode → Properties, Merits & Demerits

e) Geometric Mean → Properties, Merits & Demerits

f) Harmonic Mean → Merits & Demerits

Ques: 11. What is meant by Dispersion? What are the objectives of measuring dispersion and characteristics

of a good measure of dispersion.

Ques:12 Discuss:- (short)

a) Range → Merits & Demerits
b) Standard deviation → Merits & Demerits, Properties
c) Mean deviation → Merits & Demerits
d) Quartile Deviation → Merits & Demerits

Ques:13 What is meant by Correlation? Discuss its scope and Scatter Diagram.

Ques:14 Correlation → Merits & Demerits (short)

Ques:15 What is meant by Index Number? Discuss its uses and characteristics?

Ques:16 What is meant by Time series Analysis? Discuss its methods along with merits and demerits.

Ques:17 What is meant by Binomial Distribution? Discuss its features and usbs.

Ques:18 What is meant by Poisson Distribution? Discuss its features and uses.

Ques:19 What is meant by Normal Distribution? What are the conditions of Normality?

Practical (Table, Diagrams Ch-3,4)

→ Normal Distribution, Time series Methods.
→ Mean ⇒ Airthmetic, Geometric, Harmonic
→ Median
→ Mode
→ Quartile Deviation, Mean Deviation, Standard deviation and their coefficient
→ Karl Pearson's correlation
→ Spearman's Rank correlation
→ Methods of Index no.
→ X on Y and Y on X regression equations
→ Fitting of Binomial, Poisson distribution
